

DISCUSSION GUIDE

Bill is a 68-year-old male who was diagnosed with open-angle glaucoma (OAG) 6 years ago.

Topics

Glaucoma Treatment Options

Ocular Surface Disease

Optometrists Role

1. Prior to reviewing this case discussion, and based on the patient's initial signs and symptoms, would you have focused on the ocular surface or gone straight to changing his medication?
2. What tests would you have ordered and why?
3. How do you currently treat dry eye disease and why?
4. At what point would you consider referring a patient to a specialist?
5. What do you feel is the role of the optometrist?

Please use this guide to continue a preceptor/student conversation.
