

DISCUSSION GUIDE

Susan is a 49-year-old female who presents for comprehensive eye exam. She is a new patient to you and your office. She complains of blurry vision at near and far.

Patient Goals

CL selection

Ocular Surface Disease

Optometrist's Role

1. Prior to reviewing this case discussion, and based on the patient's initial complaint, what would have been your course of action?
2. How do you currently treat dry eye disease, when and why?
3. For this patient, what type of CL would you recommend?
4. What do you feel is the role of the optometrist?

Please use this guide to continue a preceptor/student conversation.
